

UNIT-4

WIRELESS+

STUDIO SOUND, ANYWHERE

MSRP US\$800 | €800 | £700

Seamlessly bring your studio sound to where you're most creative. Portable studio monitors with powerful performance and accurate sound representation. Battery-powered and ultra-low latency wireless audio for a cable-free experience.

Complete wireless freedom

Battery powered with 20H+ of playback time W+ Link ultra low latency wireless audio for music creation - only 16ms of latency, uncompressed audio and robust connection.

Portable studio sound

2 way active monitor featuring a 4 inch high-excursion woofer and 1 inch silk-dome tweeter Precision tonal accuracy over a flat +/-2dB frequency response from 50Hz to 20kHz Bass vent and boosting EQ tuned to provide a clean bass extension down to 40Hz

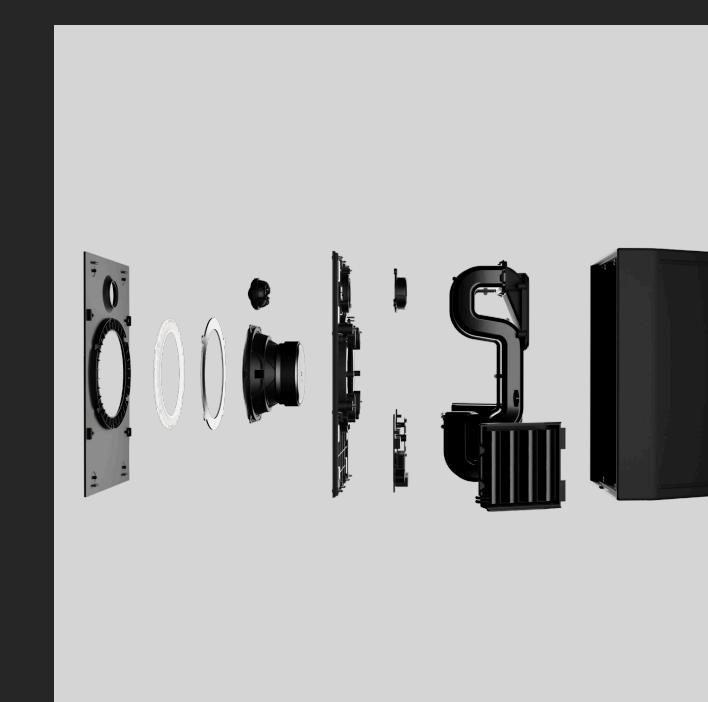

Sleek and robust design

Size and weight of only 3 litres / 2.5kg - Rear bass vent designed to be a comfortable carrying handle when on the move - Removable steel grille provides sturdy protection for the woofer and tweeter

Connect to everything

W+ Link - use the X02 transmitter for low latency wireless music creation
Bluetooth 5.2 - listen to music from your Bluetooth enabled devices
Cable - connect directly via 3.5mm mini-jack and 6.3mm balanced TRS inputs

Responsible design

Main components produced from 100% recycled plastics, from post-consumer sources
Designed for disassembly in a glue-free design - take the whole speaker apart using two screwdrivers. Replace worn out components including battery and drive units
