PRODUCT NAME

UDG Ultimate DJ Podium Workstation Black

DESCRIPTION

The UDG Ultimate DJ Podium Workstation is a premium DJ podium designed to deliver a clean, modern and professional setup with an aesthetic on-stage appearance. This DJ podium is durable, easy to setup and perfect companion piece for the DJ who likes to go completely modular.

The foldable T-shaped structure with a deck mounted on a collapsible stand with butterfly latch locks enhances stability, experiencing minimal movement or shake during use. There are 2 pre-drilled mounting holes in the top deck for third-party articulating arms which can hold laptop/tablet mounts, microphone holders, or camera mounts for streaming and recording sessions.

It's also equipped with a built-in collapsible shelf within the stand for utility storage (amp, headphone, mics, cables, etc.) The shelf and the interior deck has U-shaped cut-outs to allow air circulation and access to power and audio cables from the controller down to the base area.

Constructed from durable 15mm high-grade plywood with a premium Warnex-type textured finish, it offers a sleek matte look, ensures durability and aesthetic appeal. It makes you stand out behind your workstation!

The DJ Podium Workstation accommodates various setups effortlessly and fits most professional DJ controllers, mixers or turntables. The removable plywood top plate allows two different setup options. DJs can either use a specific acrylic faceplate so compatible equipment is recessed into the podium, or leave the plywood top plate in place to position DJ equipment directly on top of the podium surface without recessed mounting. A variety of black glossy acrylic faceplates that are specifically designed for popular DJ controllers are sold separately.

A dedicated flight case with wheels is also available separately. This case is specifically designed to pack, protect and transport the DJ Podium Workstation safely, making it ideal for touring DJs, rental companies and frequent on-the-road use.
