PIONEER DJ OPUS-QUAD FACEPLATE

U91901BL

The UDG Ultimate Pioneer DJ Opus-Quad Faceplate Black is designed to complement the modular concept of the UDG Ultimate DJ Podium Workstation, allowing compatible DJ equipment to be installed in a clean, recessed configuration. Specifically designed for use with Pioneer DJ Opus-Quad, this faceplate creates a seamless, professional-looking setup suitable for stage, studio, or booth environments.

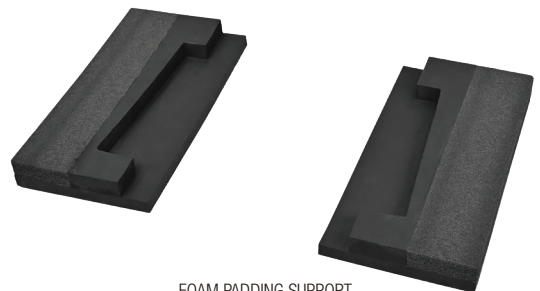

Constructed from high-quality solid glossy acrylic, the faceplate integrates precisely into the top deck of the DJ Podium Workstation. When combined with the included Foam Padding Support, it helps support the equipment from underneath, protects contact surfaces, and minimizes movement during use, while maintaining the clean visual lines of the workstation.

Note:

This product is an accessory for the UDG Ultimate DJ Podium Workstation. The DJ podium, articulating arms, and transportation flight case are sold separately.
